LEHMAN COLLEGE DEPARTMENT OF NURSING

ANNUAL HEALTH CLEARANCE REQUIREMENTS

Each Department of Nursing student must have current health clearance prior to each clinical nursing course:

Undergraduate (Generic/Accelerated RN-BS) clinical courses:	**(NUR 301, 303, 304, 400, 405, 409).**
Graduate (Master's/Post-Master's Certificate) clinical courses:	**(NUR 770, 771, 772, 773, 774, 775, 776, 809, 810, 811).**

Health clearance is required by the New York State Department of Health to determine that health care workers and students do not pose a health risk to clients, families or co-workers and to assure that the student is physically able to fulfill the objectives of the educational program.

Attached is an examination form and list of laboratory tests which must be completed and signed by a licensed healthcare provider (physician, physician's assistant, or nurse practitioner) of your choice. The completed form, including the evaluation of lab results, must be returned to the Department of Nursing.

Documentation of immunization/immunity to communicable disease needs to be completed only once if immunity is confirmed. **IMPORTANT NOTE:** The Lehman College Department of Nursing (DON) requires a criminal background check and drug testing for admittance into the program as they are preconditions for students to participate in clinical rotations at the training health institutes. The drug testing and background check policies have been established to meet contractual requirements established by clinical facilities used by the DON for clinical placements of its nursing students.

Health Clearance is valid for 12 (twelve) months

Titres are required for Mumps, Measles, Rubella, Varicella (Chicken Pox), and Hepatitis B. If titres do not show immunity, the appropriate vaccinations are required.

Rubella titre is required. This test will tell you if you have ever been exposed to Rubella or German Measles and have developed antibodies. Rubella usually results in a mild illness unless you are pregnant. Rubella during the first three months of pregnancy can result in congenital defects in the infant. If your Rubella titre is negative or less than 1:8, it means you have not developed antibodies to Rubella. A vaccine which is available through your physician will immunize you against Rubella. If your Rubella titre is positive, you do not need any additional immunization.

A Hepatitis antigen and antibody titre is required and should be done yearly. It is strongly recommended that all students receive the Hepatitis B vaccine if they are not immune. If your titres indicate that you are not immune and you decline to be vaccinated, you must sign a declination statement which is available from the secretary in the Department of Nursing.

Influenza Virus Vaccine is required and mandatory. Influenza is contagious and you may be at risk for contracting the flu virus through occupational exposure to patients and others as a nursing student assigned to are for clients in a clinical setting. Some healthcare institutions may deny your clinical placement at their site without proof of the Influenza Vaccine.
