

## Module Framework

- The engagement experience features six focus areas which are designed for phased delivery. The modules for this engagement are based on five of the focus areas 1) Case Making; 2) Foundational Learning; 3) Planning for Transformation; 4) Implementation; and 5) Iterating & Scaling. The sixth focus area, Measuring Outcomes, is appropriately interwoven throughout the five modules.

- The first two modules have cohorted, synchronous sessions with Foundational Learning involving some overlap with Planning for Transformation. The latter part of Planning for Transformation entails each institutional team finalizing their transformational plan with personalized support from their professional coach and, accordingly, piloting the plan occurs during Implementation with the continued support of the coach. To conclude, the cohort is reunited for synchronous sessions during Iterating and Scaling.
