

ePortfolio  
Guide 4 of 8

A page within your ePortfolio can contain one or more modules. These are the areas in which you place your content.

Once you add the module, you'll be in **edit** mode. Click the **Rich Text** tab to add text or media. When adding text, remember to click **Save** when you're done.

To make your changes visible to users, go to the **Publish** tab and click **Publish Changes**. If you have multiple modules, a **Publish All** button will appear on the upper right-hand side of the page.
